

Well, here we are again, with another Fourth of July! I don't remember what the high temperature was on the 4th, but look at this picture of the golf cart decorated for the parade within the Lakeside complex. There was nothing wrong with my camera, it was a good dose of fog! It was hot and sticky too! Later that day, we went to a 4th of July Party given by our Chiropractor, Dr Daniel Falk. Our neighbor, Doris, came with us. He does this every year, but this was the first year we attended. He rented a piece of property, that has a lake with a fairly large pavilion which was perfect. Unfortunately it did rain, but the pavilion did it's job! When I took the picture below, you can see Bob and Doris sitting on the lower right hand corner. In the next picture, you can see Dr Falk's Mom, Ina, trying to get my attention! There were 'goodie' dishes on the table to complement the chicken, hot dogs, and hamburgers on the grill, which was located at other end of the pavilion. The next picture is of some guests lined up for the hot foods. Note the wet pavement under their feet from the rain. It did stop raining so the fire works could be done after dark to complete the celebration. Dr Falk was in charge of the fire-works, and did a great job! I didn't take any night photos of the fireworks itself, but the next picture shows them setting up.

The picture above is of the Morris Brothers, the Gospel Blue Grass family that dates back to 1927. This is the first family to bring Gospel music into Blue Grass. Along the way some members have passed on and younger members joined. This concert was on Saturday, the 27th in the afternoon, at the Horry County Museum and was free! They are a wonderful band and we were pleased to see such a great turn out. We have seen them more than once at the Rivertown Blue Grass Society monthly concert at the Horry County Technical College.
